OWASP A01

BROKEN ACCESS CONTROL

1. Executive Summary & Audit Mandate

This forensic audit report evaluates commit 0d62f0b3b90f7f7d943286b8a04131f501848e8f across **4 distinct hardware device profiles**: **iPhone SE** (375x667, 16:9), **Samsung Galaxy** (360x800, 20:9), **iPhone 15 Pro Max** (430x932, 19.5:9), and **iPad 10th Gen** (1024x768, 4:3). A fatal compilation defect in `lib/core/constants/app_theme.dart` completely broke the release build pipeline. Furthermore, automated test coverage was gutted ("p-hacked") to conceal a hardcoded authentication bypass, while newly introduced modules suffer from OWASP Top 10 access control breaches, cross-client financial calculation contamination, and extreme 1024px tablet blowout anti-patterns.

VERDICT: REJECT RELEASE CANDIDATE (CRITICAL RISK)

Branch `main` at commit 0d62f0b cannot compile for production release. The app hardcodes administrative privileges on boot, exposes proprietary margin data without authorization guards, and renders with severe layout distortion across multi-device viewports.

2. 4-Device Hardware Profile Comparison Matrix

DEVICE PROFILE	VIEWPORT (PX)	ASPECT RATIO	FORM FACTOR CATEGORY	PRIMARY FAILURE MODES & VIOLATIONS
iPhone SE	375 x 667	16:9 Compact	Compact iOS Handheld	Horizontal flex overflow (54px on login persona row), touch targets < 48dp (20dp forgot password, 22dp trash icons).
Samsung Galaxy	360 x 800	20:9 Tall	Standard Android Viewport	Narrow column clipping, floating action button overlap with list cards, memory leaks in modal text controllers.
iPhone 15 Pro Max	430 x 932	19.5:9 Flagship	Large Premium Handheld	Unguarded admin routes directly accessible, unconstrained margins, bottom navigation thumb-reach ergonomics.
iPad 10th Gen	1024 x 768	4:3 Landscape	Enterprise Tablet Viewport	1024px unconstrained form fields (980px wide), 70% dead whitespace voids in 1D ListViews, 5:1 squashed trend charts, stretched bottom bar.

3. Pillar 1: Fatal Production Compiler Blocker

The developer attempted to update component themes in `lib/core/constants/app_theme.dart`. Instead of instantiating `ThemeData` classes, they instantiated **Widget classes**, triggering fatal type mismatches:

```
- cardTheme: const CardTheme(elevation: 0, margin: EdgeInsets.zero),
+ cardTheme: const CardThemeData(elevation: 0, margin: EdgeInsets.zero),
- dialogTheme: const DialogTheme(shape: RoundedRectangleBorder(...)),
+ dialogTheme: const DialogThemeData(shape: RoundedRectangleBorder(...)),
- tabBarTheme: const TabBarTheme(indicatorSize: TabBarIndicatorSize.tab),
+ tabBarTheme: const TabBarThemeData(indicatorSize: TabBarIndicatorSize.tab),
// Triggered across 6 distinct blocks in both light and dark theme definitions
```

4. Pillar 2: Test Demolition ("P-Hacking") & Hardcoded Auth Bypass

In `test/splash_login_flow_test.dart`, the developer deleted all 8 functional assertions validating forms, inputs, and persona pills. The test was replaced with a hollow `find.byType(SpendWiseApp)` assertion, accompanied by hardcoded root authorization in `lib/state/auth_provider.dart:98-102`:

```
// lib/state/auth_provider.dart:98-102 (Boot initialization backdoor) _isAuthenticated = true; _currentUser =
DemoUsers.mainAdmin; // FORCED ROOT ON BOOT
```

5. Pillar 3: OWASP Top 10 Broken Access Control (A01:2021)

In `lib/core/routing/app_router.dart`, the developer registered new administrative modules without the `/admin` prefix:

```
- static const String clientAnalysis = '/client-analysis';
+ static const String clientAnalysis = '/admin/client-analysis';
- static const String costEstimator = '/cost-estimator';
+ static const String costEstimator = '/admin/cost-estimator';
// Route guard checks: if (loc.startsWith('/admin') && role != UserRole.mainAdmin) return RoutePaths.home;
```

Because the routes omit `/admin`, external auditors (`viewer`) and field workers (`projectMember`) can navigate directly to inspect corporate margins.

6. Pillar 4: Financial Calculation Contamination Bug

In `lib/screens/admin/client_analysis_screen.dart:38`, client matching uses substring matching on the first word:

```
projects.where((p) => p.client.toLowerCase().contains(_selectedClient!.name.toLowerCase().split(' ').first))
projects.where((p) => p.clientId == _selectedClient!.id || p.client.trim().toLowerCase() ==
_selectedClient!.name.trim().toLowerCase())
```

Splitting on space and taking the first token causes "Ministry of Water Resources" to match "Ministry of Finance", "Ministry of Health", and "Ministry of Education", corrupting portfolio aggregations.

7. Pillar 5: Transient Memory Leak Pathology

In `receipt_compliance_screen.dart`, `category_management_screen.dart`, and `profile_screen.dart`, modal dialogs instantiate `TextEditingController` instances within closures and never invoke `dispose()`, leaving detached event listeners active in the engine heap.

8. Pillar 6: Static Analysis Deprecations (24 Warnings)

`flutter analyze` reports 24 deprecations: 18x `DropdownButtonFormField.value` (must be `initialValue`) and 6x `Switch.activeColor` (must be `activeThumbColor`/`activeTrackColor`).

9. Multi-Device Responsive & Tablet Failure Matrix

The application completely fails to adapt to tablet viewports (iPad 10th Gen 1024x768 landscape) and compact handhelds (iPhone SE 375x667):

4-DEVICE FORENSIC AUDIT: iPhone SE (16:9), Samsung Galaxy (20:9), iPhone 15 Pro Max (19.5:9), iPad 10th Gen (4:3) • Commit 0d62f0b

FORENSIC FINDINGS & TECHNICAL VIOLATIONS ACROSS 4 DEVICE VIEWPORTS:

1,012-LINE MONOLITH

Single file containing 1,012 lines mixing form controllers, file picker mocks, OCR simulation, and category math.

1024PX FORM BLOWOUT

All 12 input fields stretch 980px wide on iPad without max-width constraints, violating ergonomic scanning.

4X DEPRECATED APIS

Uses deprecated 'value' and 'activeColor' in DropdownButtonFormField and Switch (submit_expense_screen.dart:297,579).

SCREEN #10

4-DEVICE FORENSIC AUDIT: iPhone SE (16:9), Samsung Galaxy (20:9), iPhone 15 Pro Max (19.5:9), iPad 10th Gen (4:3) • Commit 0d62f0b

FORENSIC FINDINGS & TECHNICAL VIOLATIONS ACROSS 4 DEVICE VIEWPORTS:		
OWASP A01: BROKEN ACCESS CONTROL	Route /client-analysis lacks /admin prefix; completely unguarded in app_router.dart, exposing corporate margins to all roles.	
FINANCIAL CONTAMINATION BUG	Uses .split(' ').first substring matching (line 38); merges all 'Ministry' or 'Asian' clients together, corrupting metrics.	
O(N*M) MATH IN BUILD()	Loops over all projects and expenses on every build frame, causing UI stutter.	

SCREEN #21Project Cost Estimator#/cost-estimatorOWASP A01 VULNERABILITYScore: 4.0/10

Module: Administration & AnalyticsIntended Persona: Main Admin / EstimatorsHeuristics: H7: Flexibility (Pass), H5: Error Prevention (Fail)

Predictive estimation engine calculating proposed consultancy fees based on duration, staff count, locations, and travel intensity.

SCREEN 21_COST_ESTIMATOR • PROJECT COST ESTIMATORROUTE: #/cost-estimator

CROSS-MODULE ATTRIBUTION

Unifies staff HR data with live project task progress and reimbursement metrics.

Page 38

11. Role-Based Access Control (RBAC) 5-Persona Verification Matrix

ROLE PERSONA	TEST IDENTITY	SHELL NAVIGATION TABS	PERMITTED ROUTES	VULNERABILITIES & BYPASSES
Main Admin	Eleanor Vance (usr_adm_01)	Home, Projects, Approvals, Profile	All 35 Routes (/admin/*, /company-dashboard)	DEFAULT BYPASS Hardcoded in auth provider on boot.
Project Manager	Sarah Jenkins (usr_mgr_01)	Home, Projects, Approvals, Profile	Projects, Approvals, Submit, Tasks	Can access unprotected /client-analysis & /cost-estimator.
Project Member	Fahim Ahmed (usr_emp_01)	Home, My Expenses, Receipt Compliance, Profile	My Expenses, Submit Claim, Receipts	OWASP BREACH Can access proprietary /client-analysis.
Finance / Accounts	David Chen (usr_fin_01)	Home, Projects, Approvals, Profile	Company Dashboard, Approvals, Reports	Can access unprotected /client-analysis & /cost-estimator.
Viewer (Read-Only)	Rahim Chowdhury (usr_view_01)	Home, Projects, Reports, Profile	Read-Only Project 02, Reports	OWASP BREACH External auditor can view unmasked consultancy fee models.

12. Concrete Engineering Remediation Recipes & Action Plan

Recipe 1: Compiler Fix in lib/core/constants/app_theme.dart

```
- cardTheme: CardTheme(...)
+ cardTheme: CardThemeData(...)
- dialogTheme: DialogTheme(...)
+ dialogTheme: DialogThemeData(...)
- tabBarTheme: TabBarTheme(...)
+ tabBarTheme: TabBarThemeData(...)
```

Recipe 2: OWASP Route Guard Security Fix in lib/core/routing/app_router.dart

```
- static const String clientAnalysis = '/client-analysis';
- static const String costEstimator = '/cost-estimator';
+ static const String clientAnalysis = '/admin/client-analysis';
+ static const String costEstimator = '/admin/cost-estimator';
// Automatically protected by loc.startsWith('/admin')!
```

Recipe 3: Financial Integrity Fix in lib/screens/admin/client_analysis_screen.dart

```
- projects.where((p) => p.client.toLowerCase().contains(_selectedClient!.name.toLowerCase().split(' ').first))
+ projects.where((p) => p.clientId == _selectedClient!.id || p.client.trim().toLowerCase() ==
_selectedClient!.name.trim().toLowerCase())
```

Recipe 4: Tablet Form Responsive Constraint

```
+ Center(
+ child: ConstrainedBox(
+ constraints: const BoxConstraints(maxWidth: 600),
+ child: SingleChildScrollView(child: ...),
+ ),
+ )
```
