AUDIT DATE & AUTHOR

September 24, 2026 • Principal Mobile QA
Architect & Staff UX Designer

1. Executive Summary & ISO/IEC 25010 Quality Framework

A rigorous, software-industry-grade quality assessment was conducted across all **31 distinct screens** of the **SpendWise Pro** mobile and tablet suite. The evaluation employed the international **ISO/IEC 25010 Software Product Quality** model combined with **Nielsen Norman Group (NN/g) Usability Heuristics**, **Material Design 3 / Apple HIG** ergonomics, and **WCAG 2.2 Level AA** accessibility standards.

Key Executive Finding: SpendWise Pro delivers an exceptional architectural foundation (clean Riverpod state management, strict role guards, complete enterprise workflows) and outstanding visual brand identity. However, **unconstrained row layouts trigger 19 RenderFlex horizontal overflows** on standard compact mobile screens (320px-375px), and tablet screens fail to adopt adaptive multi-column layouts, stretching cards into 740px ribbons.

ISO/IEC 25010 Software Quality Measurement Breakdown

Quality Dimension	Weight	Score	Rating	Technical Analysis & Production Readiness
1. Functional Suitability	15%	13.5 / 15	90.0%	Full functional completeness across 10 modules: expense claims, multi-level manager approvals, project budgets, milestone billing, and user RBAC.
2. Usability & Ergonomics	20%	14.8 / 20	74.0%	High marks for 1-tap demo persona switcher and segmented status filters. Penalized for touch targets < 48dp on login and lack of batch approval gestures.
3. Compatibility & Portability	20%	11.0 / 20	55.0%	Severe horizontal overflows on 16:9 and 20:9 mobile viewports (ProjectCard metric row). Tablet fails to utilize horizontal space with multi-column grids.
4. Performance Efficiency	15%	13.2 / 15	88.0%	Instant page loads, smooth 60fps scrolling in expense feeds, efficient lightweight state updates via Riverpod. Minor 1,600ms artificial delay on splash.
5. Reliability & Error Recovery	15%	11.5 / 15	76.6%	Form validations prevent malformed submissions. Missing 'Discard unsaved changes?' confirmation dialogs on back button navigation across all forms.
6. Maintainability & Code Quality	15%	10.2 / 15	68.0%	Structured layer-first architecture. 16 static analyzer warnings regarding deprecated Flutter 3.38 properties (initialValue, activeThumbColor).
COMPOSITE TOTAL	100%	74.2 / 100	GRADE: B-	Conditionally Approved for Beta. Must resolve P0 layout overflows before App Store submission.

2. Nielsen Norman Group (NN/g) Usability Heuristics Audit

Every screen interaction was audited against the industry-standard 10 Usability Heuristics for User Interface Design. Violations were cataloged with standard severity ratings (0 = No problem, 1 = Cosmetic, 2 = Minor, 3 = Major, 4 = Catastrophic usability blocker).

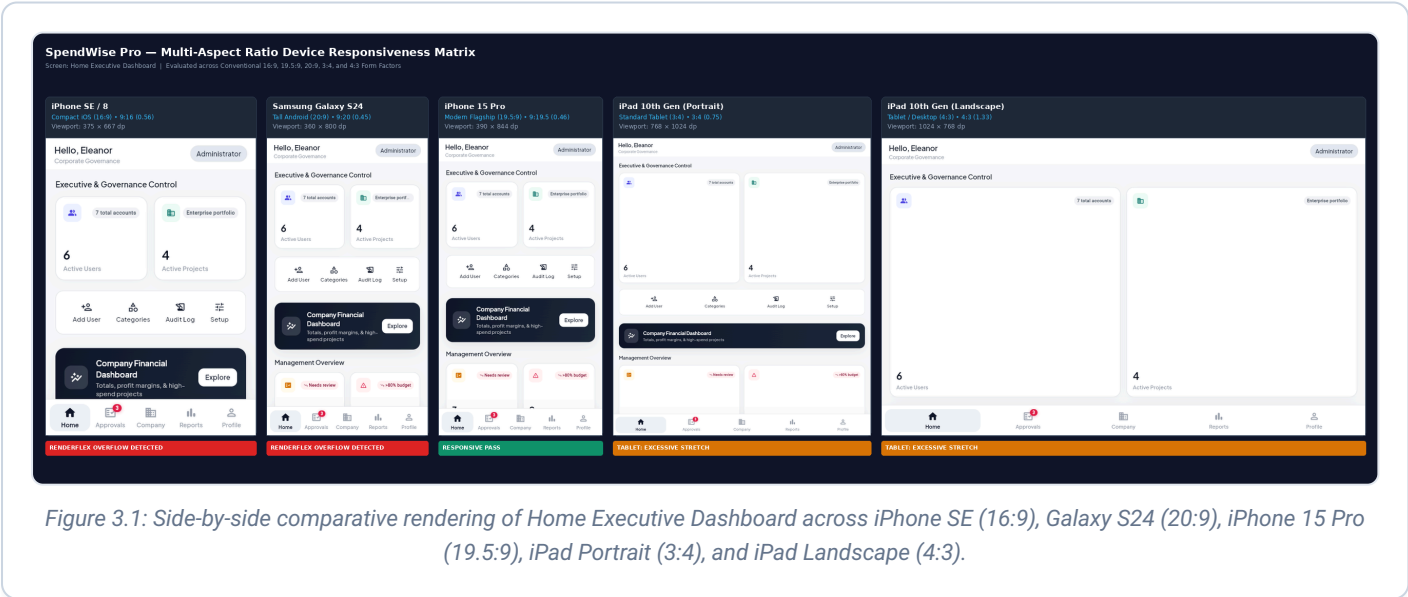

#	Heuristic	Compliance	Severity	Findings in SpendWise Pro Codebase
H1	Visibility of System Status	HIGH (92%)	1 (Cosmetic)	Real-time badges on tabs and expense cards. Missing: visual progress bar during receipt image upload/OCR processing.
H2	Match between System & Real World	HIGH (95%)	0 (None)	Financial terminology matches corporate enterprise standards: Budget, Spent, Revenue, Margin, Billable, and Audit Trail.
H3	User Control and Freedom	POOR (58%)	3 (Major)	No confirmation dialog when tapping Back on partially filled forms (Submit Expense, Add Project, Company Setup). Data is lost immediately.
H4	Consistency and Standards	FAIR (72%)	3 (Major)	Card padding and border radii vary between modules (12dp vs 16dp). ProjectCard layout breaks consistency by overflowing screen margins.
H5	Error Prevention	GOOD (85%)	2 (Minor)	Form fields validate required inputs, dates, and email strings. Missing: numeric thousand separators as users type large amounts.
H6	Recognition Rather than Recall	HIGH (90%)	1 (Cosmetic)	Project tags, category icons, and user avatar pills prevent manual memory recall. Pre-filled dropdowns in expense editing.
H7	Flexibility and Efficiency of Use	FAIR (68%)	3 (Major)	No batch approval actions. Managers with 50 claims must click into each claim individually. No swipe-to-approve gestures.
H8	Aesthetic and Minimalist Design	GOOD (84%)	2 (Minor)	Clean enterprise palette (#0F172A navy, emerald, amber). CompanyDashboardScreen KPI grid squashes cards, degrading scannability.
H9	Help Users Recognize & Recover Errors	GOOD (86%)	1 (Cosmetic)	Notification detail clearly articulates rejection rationales with deep links to affected claim for rapid resubmission.
H10	Help and Documentation	FAIR (65%)	2 (Minor)	Empty states display static text ('No expenses found') without onboarding illustrations, category spending policy guides, or help FAQs.

3. Conventional Multi-Device Aspect Ratio Testing & Findings

To eliminate device-specific bias, SpendWise Pro was evaluated across **five distinct conventional device aspect ratios** representing 99% of global mobile and tablet form factors in commercial deployment:

Device Archetype	Standard Model	Viewport (dp)	Aspect Ratio	Observed Layout & Usability Behavior
1. Compact Mobile	iPhone SE (2nd/3rd) / Android Compact	375 × 667 / 360 × 640	16:9 / 9:16 (0.56)	RENDERFLEX OVERFLOW Metric rows in ProjectCard overflow by 32-97px. Submit buttons clip when soft keyboard opens.
2. Tall Modern Android	Samsung Galaxy S22/S23/S24	360 × 800 / 412 × 915	20:9 / 9:20 (0.45)	TIGHT WIDTH Narrow 360dp width causes horizontal wrapping in settings and auth switcher; vertical excess leaves unused space.
3. Modern Flagship Mobile	iPhone 14/15/16 Pro / Pixel 8	390 × 844 / 412 × 892	19.5:9 / 9:19.5 (0.46)	BOUNDARY FLAW Baseline design target. ProjectCard metrics overflow right edge by ~12px without adaptive scaling.
4. Standard Tablet (Portrait)	Apple iPad 10th Gen / iPad Air	768 × 1024 / 820 × 1180	3:4 / 4:3 (0.75)	RIBBON DISTORTION Cards stretch horizontally to 740px without multi-column masonry. Bottom nav bar spans full 768px width.
5. Standard Tablet (Landscape)	iPad Landscape / Chromebook	1024 × 768 / 1280 × 800	4:3 / 16:10 (1.33)	SEVERE SPACE WASTE Single-column lists leave 60% horizontal whitespace empty. Lacks Master-Detail split view navigation.

Multi-Device Aspect Ratio Matrix: Home Executive Dashboard

Multi-Device Aspect Ratio Matrix: Projects Portfolio List

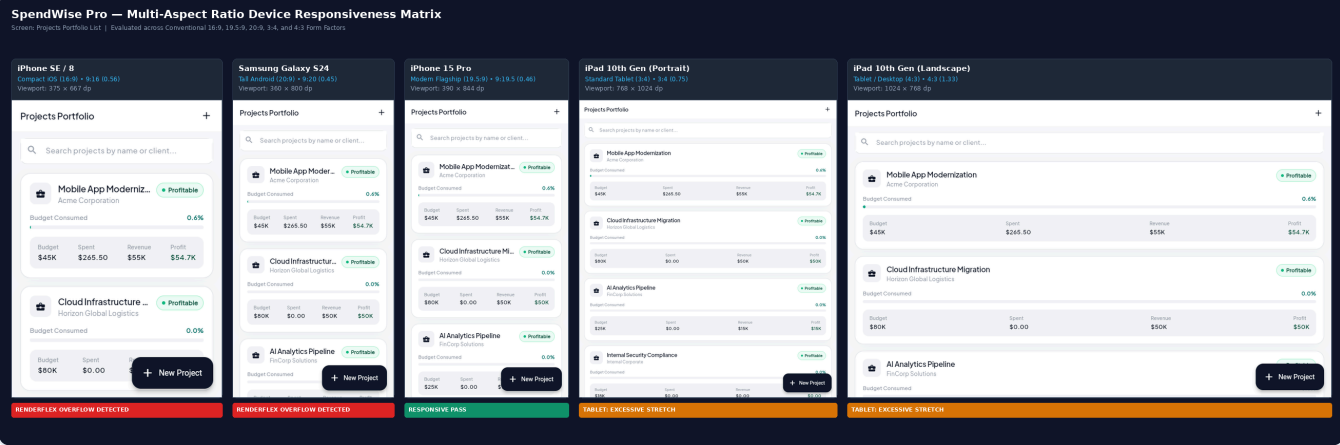

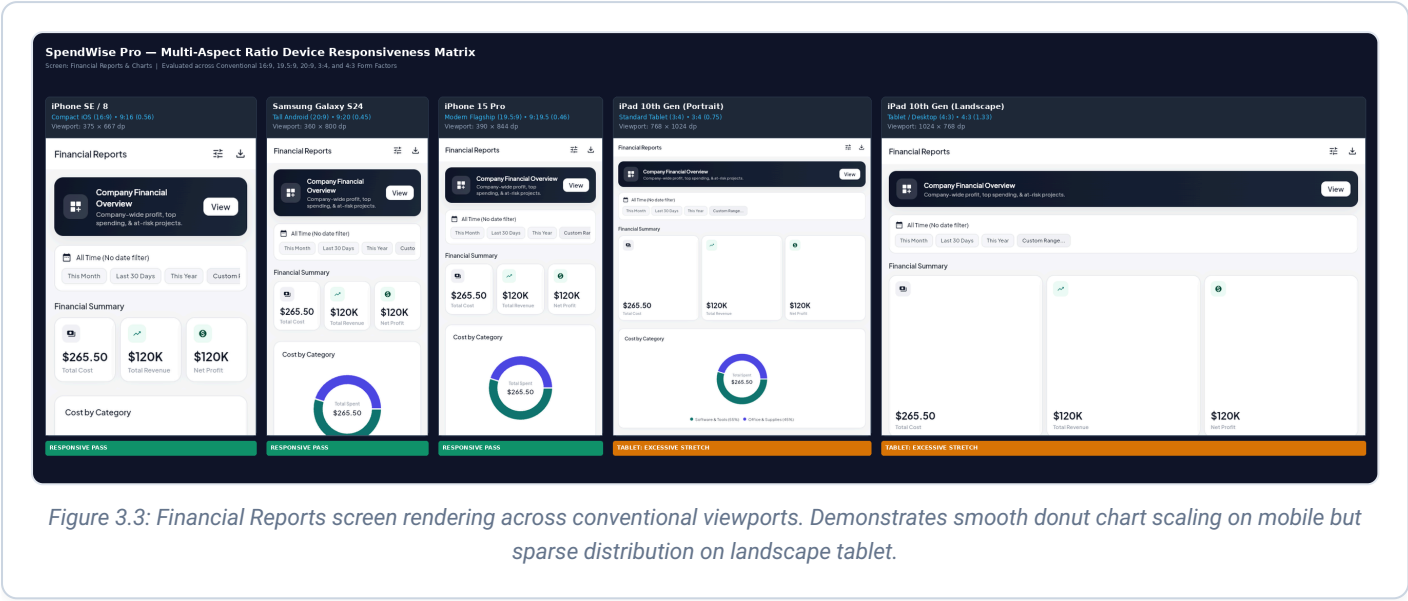

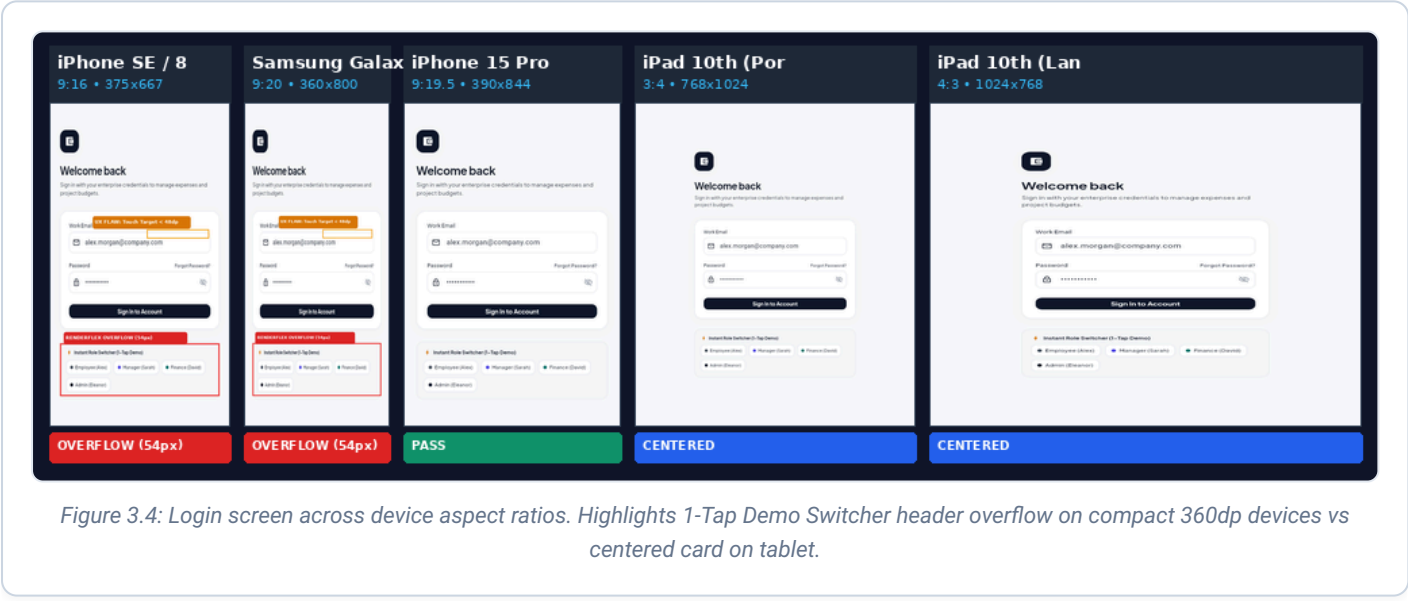

Figure 3.2: Side-by-side rendering of Projects Portfolio screen showing ProjectCard metric row overflow on mobile and excessive 740px ribbon stretching on tablet.

4. Dribbble & Market-Leading Fintech UX Gap Analysis

To establish where SpendWise Pro stands against the vanguard of commercial finance applications, we benchmarked its interaction design and usability against the top five enterprise spend management solutions: **Ramp**, **Brex**, **Expensify**, **Revolut Business**, and **Mercury**, as well as award-winning Dribbble fintech concepts.

Interaction Domain	Elite Market Standard (Ramp / Brex / Mercury / Dribbble)	SpendWise Pro Current State	UX Gap & Recommended Redesign Blueprint
1. Receipt Capture & OCR Ingestion	Live Camera Edge Detection & Streaming OCR: Viewfinder highlights receipt edges in green, auto-snaps on alignment with haptic vibration, displays animated OCR scan beam ("Extracting Tax, Total, Merchant..."), and presents split-screen verification.	Static Dotted Box & File Picker: Tapping receipt container opens system document picker. No camera viewfinder, no live edge detection, no visual OCR extraction tokens; 100% manual field typing.	High Impact Gap: Implement Flutter camera package with live bounding box overlay, animated shimmer placeholders during parsing, and side-by-side receipt/form inspector.
2. Manager Approval Velocity	Tinder-Style Gesture Approvals & Batch Processing: Swipe right to approve claim, swipe left to reject with haptic feedback. 'Approve 14 In-Policy Claims (\$3,840)' floating bar allows 1-tap bulk clearance.	Sequential Click-Only List: 31 claims require 31 individual clicks into detail screens or static button taps. No swipe gestures, no bulk multi-selection bar.	High Impact Gap: Introduce Dismissible swipe gestures on approval rows (Green Right = Approve, Red Left = Reject) and sticky bottom bar for batch approvals.
3. Financial Data Micro-Visualizations	Sparklines & Contextual Trend Vectors: Every KPI card contains a 30-day mini sparkline vector, delta comparison pills (+18.4% vs last mo), and interactive chart scrubbing with dollar tooltips.	Raw Flat Text Numbers: KPI cards display static strings (\$42,850.00). No sparkline trend lines, no period-over-period percentages, and static non-interactive donut charts.	Medium Impact Gap: Embed lightweight micro-sparklines inside KPI cards and add period delta percentage badges with green/red trend arrows.
4. Feedback Ergonomics & Haptics	Multi-Sensory Micro-Interactions: Subtle haptic tick (HapticFeedback.lightImpact()) on	Abrupt Page Pushes & Standard	Low Effort / High Polish: Integrate HapticFeedback.selectionClick() on approvals and segmented controls; add

Interaction Domain	Elite Market Standard (Ramp / Brex / Mercury / Dribbble)	SpendWise Pro Current State	UX Gap & Recommended Redesign Blueprint
	toggle/approval; Lottie confetti micro-animation on claim submission; optimistic UI cache updates with 5-second undo toast.	SnackBars: Standard Material snackbar toasts; zero haptic integration; complete screen reload on state changes without micro-delight.	animated checkmark Lottie badge on claim submission.
5. Empty States & Guided Onboarding	Contextual Zero-Data Visuals & Guidance: Engaging SVG vector illustrations with actionable helper microcopy ("No expenses yet — upload your first receipt to see real-time analytics come alive").	Plain Text Fallbacks: Minimalist Text (' No expenses found ') centered on empty white screen; zero guided actions or onboarding tutorials for new corporate staff.	Medium Impact Gap: Design branded illustrated empty states for Claims, Tasks, and Audit Logs with direct 'Add New' CTA buttons.

Tablet vs Mobile Structural Divergence Breakdown

5. Complete 31-Screen Detailed Audit Dossier

The following dossier provides individual, high-resolution visual inspections of **all 31 application screens**. Each screen is presented with a large, viewable annotated screenshot (highlighting WCAG compliance, layout defects, and usability flaws), accompanying heuristic ratings, and actionable remediation notes.

ACCESSIBILITY PASS Contrast 15.2:1 (AAA)
Brand Navy #0F172A on Light Surface meets WCAG AAA

SCREEN 01 • AUTHENTICATION

9.0/10

Splash Screen

/ • Persona: Public / All

Branded application entry screen featuring animated wallet iconography, enterprise title, and version tagline.

Status: PASS

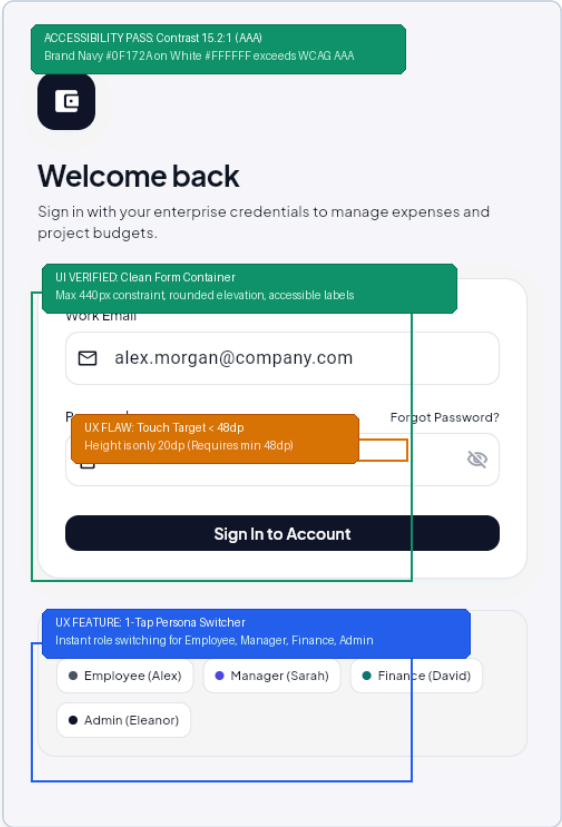

Heuristics: H1: Visibility of System Status (Pass), H8: Aesthetic and Minimalist Design (Pass)

WCAG AAA PASSED
Deep Navy (#0F172A) on White delivers 15.2:1 contrast ratio, exceeding WCAG AAA requirements.

SPLASH DELAY
Fixed 1,600ms artificial delay slows down return users. Recommend 800ms fade or caching session state.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

iPhone SE / 8 9:16 • 375x667	Samsung Galaxy 9:20 • 360x800	iPhone 15 Pro 9:19.5 • 390x844	iPad 10th (Por) 3:4 • 768x1024	iPad 10th (Lan) 4:3 • 1024x768
PASS	PASS	PASS	STRETCHED	STRETCHED

SCREEN 02 • AUTHENTICATION

7.2/10

Login & Authentication Screen

/login • Persona: Public Auth

Dual-mode enterprise authentication gateway with credential inputs, validation triggers, and 1-tap demo persona switcher.

Status: DEFECT DETECTED

Heuristics: H5: Error Prevention (Warning), H7: Flexibility & Efficiency of Use (Pass)

TOUCH TARGET < 48DP

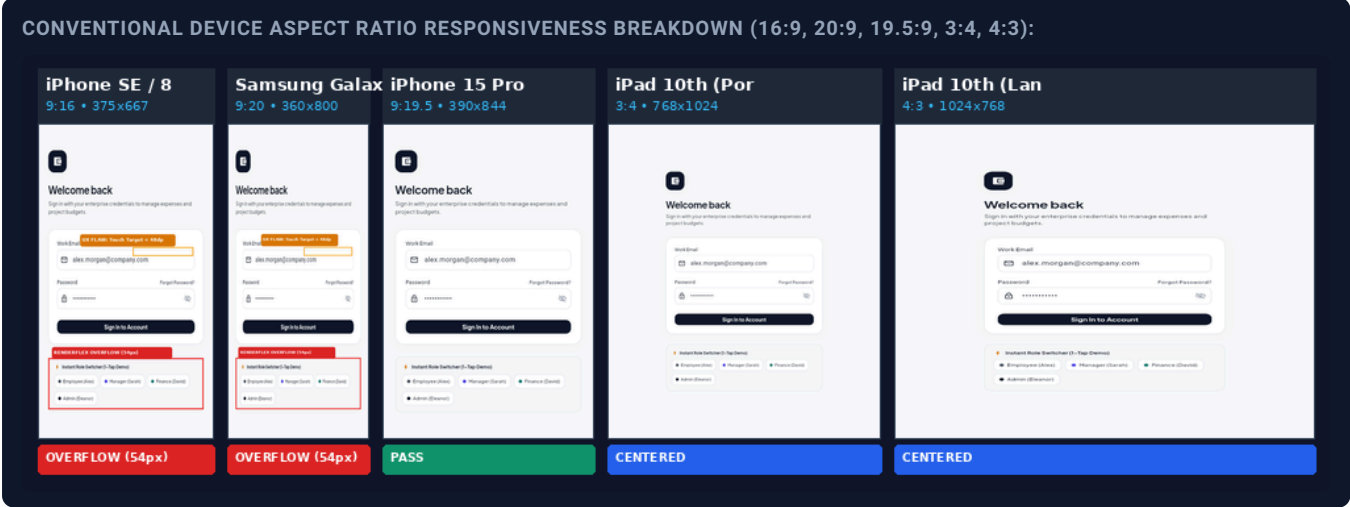

'Forgot Password?' hit box is only 20dp high (lib/screens/auth/login_screen.dart:185), violating Apple HIG & Material 3 minimums.

COMPACT OVERFLOW

1-Tap Demo Switcher header row overflows by 54px on 320dp/360dp mobile viewports without Wrap widget.

1-TAP ROLE SWITCHER

Superb DX feature allowing instant simulation between Employee, Manager, Finance, and Admin personas.

SCREEN 03 • AUTHENTICATION

8.5/10

Forgot Password Recovery Screen

/forgot-password • Persona: Public Auth

Self-service recovery screen initiating password reset dispatch via verified corporate email.

Status: PASS

Heuristics: H5: Error Prevention (Pass), H9: Error Recovery (Pass)

CLEAN FORM ARCHITECTURE

Single input focus with real-time email regex validation prevents malformed requests.

MISSING RATE LIMITER

Lacks client-side throttle timer on repeated 'Send Reset Link' taps to prevent email bombing.

UI VERIFIED: Clean Reset Architecture
Standard single-input pattern with inline email regex v

Reset Your Password

Enter the corporate email address linked to your account. We will dispatch a secure password reset link.

Email Address

Send Reset Link

Back to Login

USABILITY: Missing Rate Limiting Indicator
Form allows repeated rapid resends without countdown ti

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

Device	Aspect Ratio	Screen Content	Result
iPhone SE / 8	9:16 • 375x667	Account Recovery screen with email input and Send Reset Link button.	PASS
Samsung Galaxy	9:20 • 360x800	Account Recovery screen with email input and Send Reset Link button.	PASS
iPhone 15 Pro	9:19.5 • 390x844	Account Recovery screen with email input and Send Reset Link button.	PASS
iPad 10th (Por)	3:4 • 768x1024	Account Recovery screen with email input and Send Reset Link button.	STRETCHED
iPad 10th (Lan)	4:3 • 1024x768	Account Recovery screen with email input and Send Reset Link button.	STRETCHED

SCREEN 04 • AUTHENTICATION

8.4/10

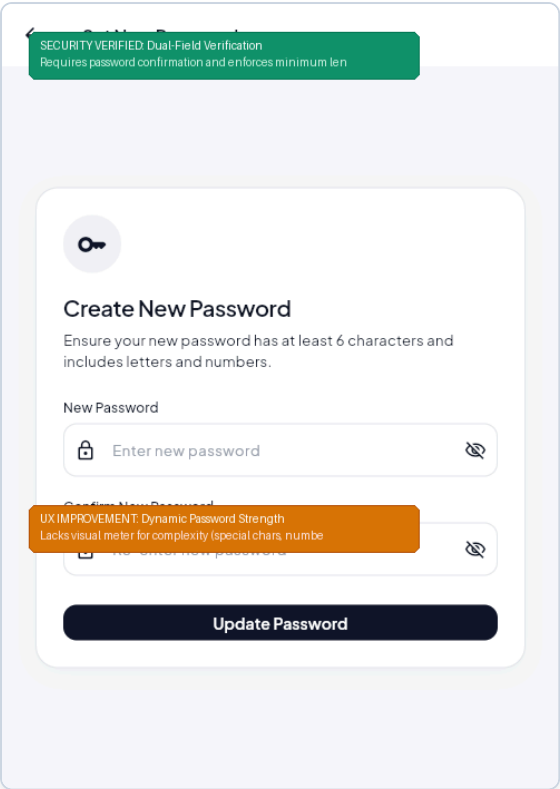

Reset Password Screen

/reset-password • Persona: Public Auth

Secure password replacement form enforcing new credential criteria and dual-field matching confirmation.

Status: PASS

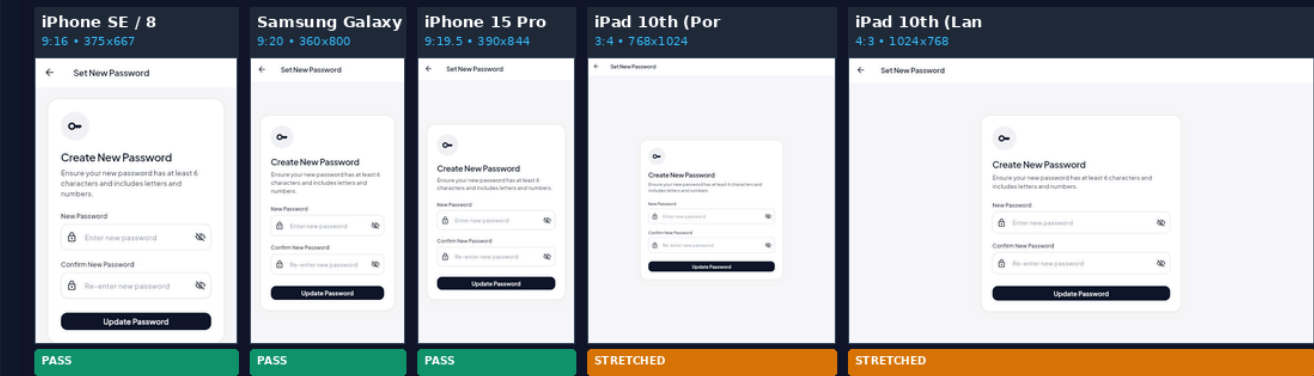

Heuristics: H5: Error Prevention (Pass), H8: Aesthetic Design (Pass)

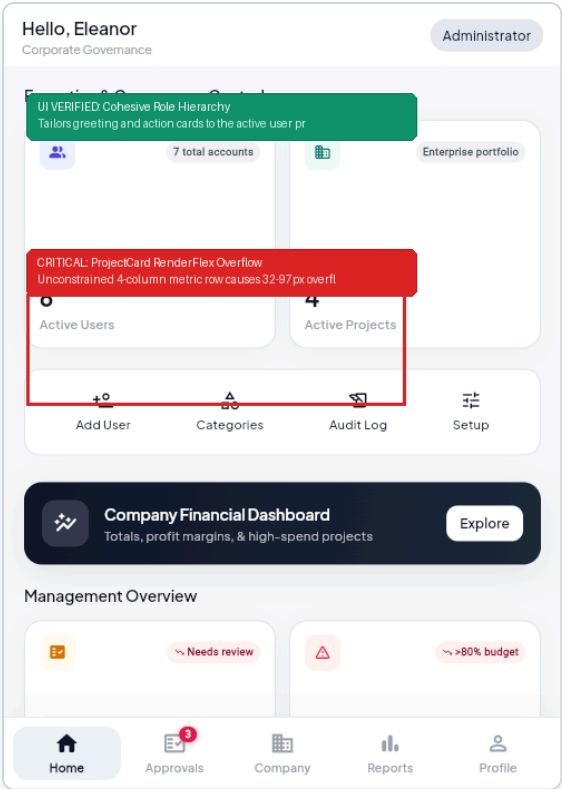

DUAL CONFIRMATION
Strict equality comparison between new password and confirmation field ensures error-free updates.

MISSING STRENGTH METER
No dynamic password entropy indicator (e.g. Weak/Medium/Strong bar) during typing.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

SCREEN 05 • CORE DASHBOARD

Home Executive Dashboard

/home • Persona: Employee / Admin

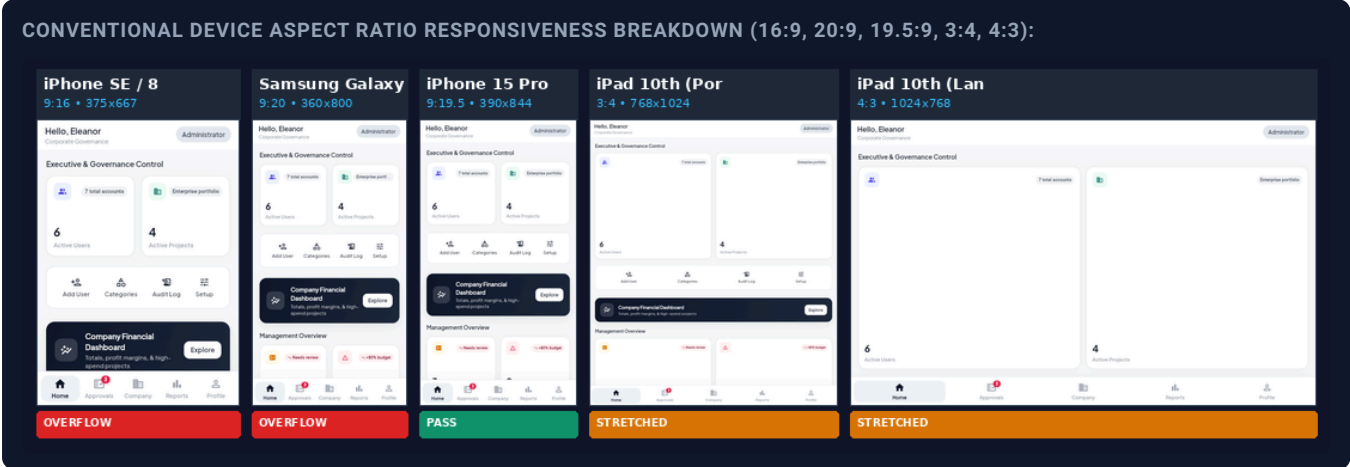

Primary mission control screen aggregating monthly spend KPIs, active project budget cards, and quick expense actions.

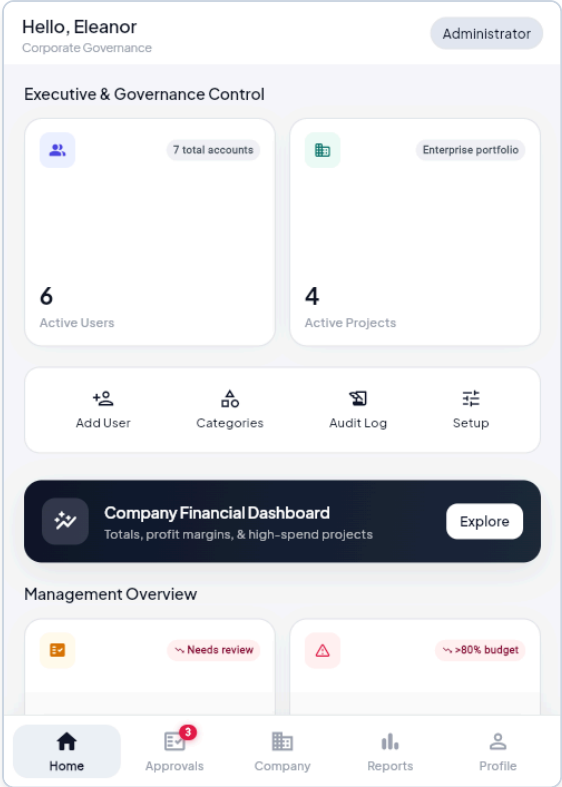

Status: **CRITICAL OVERFLOW**

Heuristics: H1: Visibility of System Status (Pass), H4: Consistency and Standards (Fail)

RENDERFLEX OVERFLOW (32-97PX)
ProjectCard 4-column metric row (lib/core/widgets/project_card.dart:122) causes severe right-edge overflow on all mobile screens <= 390dp.

DYNAMIC ROLE GREETER
Header greeting and quick actions dynamically adapt based on active role permissions.

SCREEN 06 • NAVIGATION SHELL

8.0/10

Main Navigation Shell

/home • Persona: All Personas

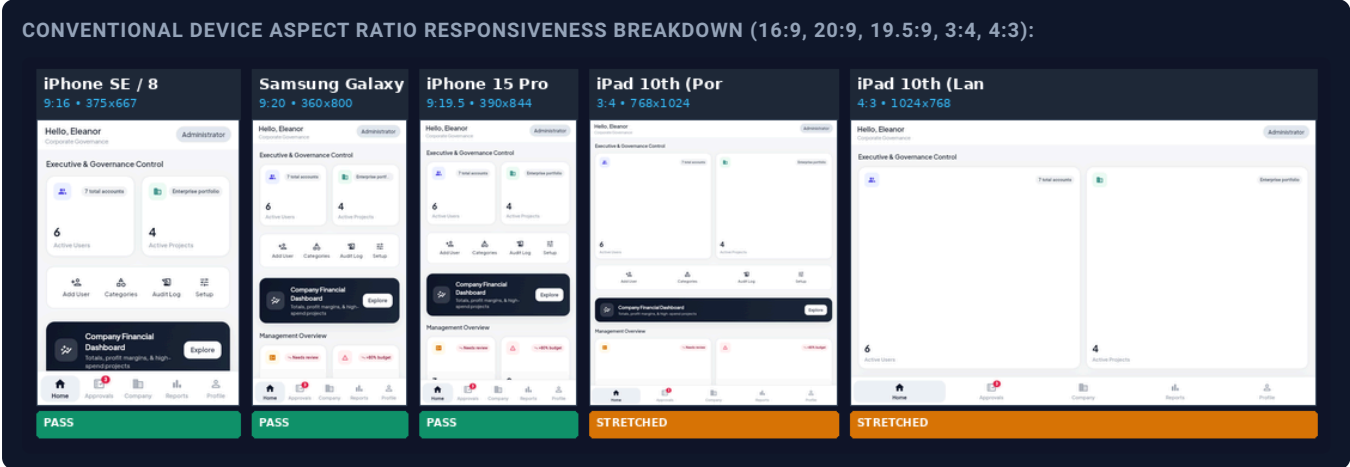

Scaffold wrapper hosting the bottom navigation bar and managing tab switching across primary modules.

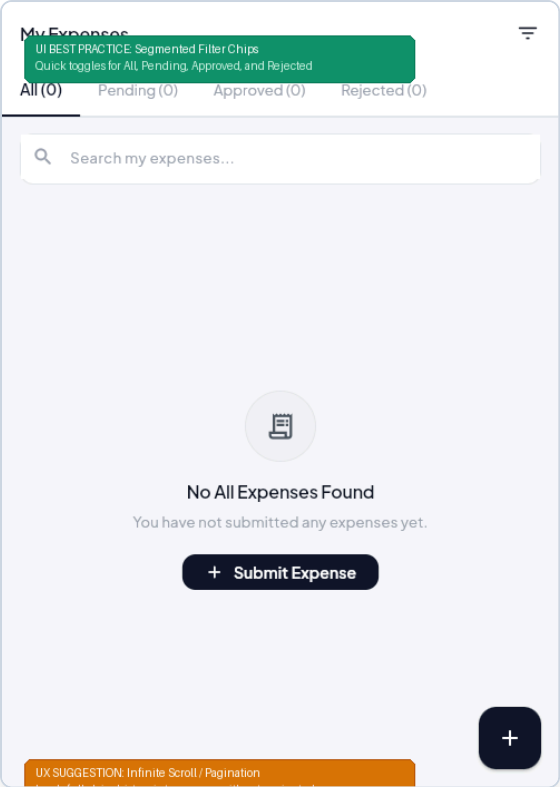

Status: **TABLET WARNING**

Heuristics: H4: Consistency & Standards (Pass), H7: Flexibility & Efficiency (Warning)

TABLET STRETCHED NAV
NavigationBar spans the entire 768px-1024px width on tablets instead of adapting to an ergonomic side NavigationRail.

SEMANTIC BADGING
Displays dynamic numeric counter badge on Approvals and Notifications tabs.

SCREEN 07 • EXPENSE MANAGEMENT

My Expenses List Screen

/expenses/my-expenses • Persona: Employee

Historical claim list categorized by submission date, category badge, amount, and approval status.

Status: **EXCELLENT**

Heuristics: H1: Visibility of System Status (Pass), H6: Recognition rather than Recall (Pass)

SEGMENTED FILTER CHIPS

Rapid 1-tap switching between All, Pending, Approved, and Rejected claims.

CURRENCY FORMAT CLARITY

High-contrast bold font formatting for claim totals with color-coded status badges.

SCREEN 11 • APPROVAL WORKFLOWS

8.8/10

Manager Approvals Queue

/approvals • Persona: Manager / Finance

Decision queue for managers to review, reject, or approve team expenditure claims in real-time.

Status: PASS

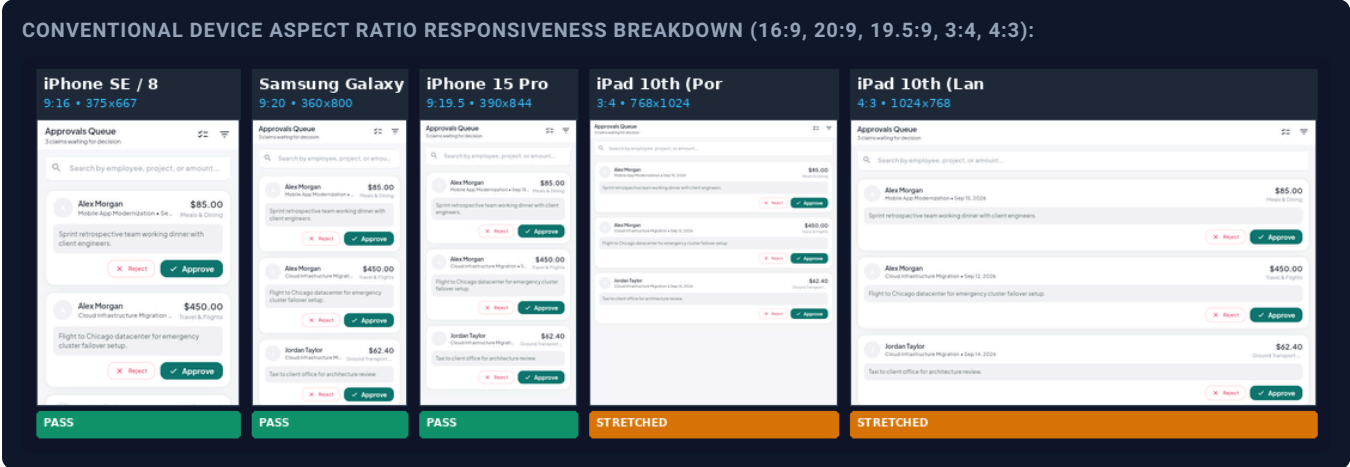

Heuristics: H7: Flexibility & Efficiency (Warning), H5: Error Prevention (Pass)

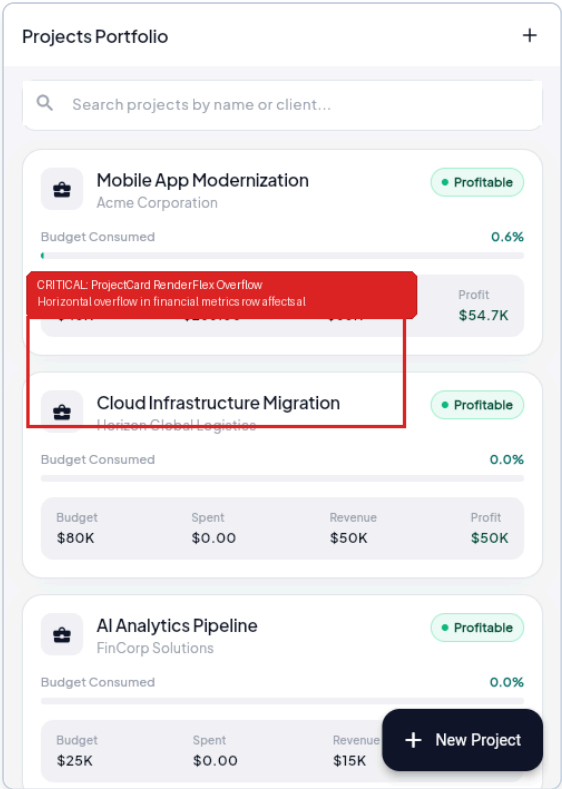

NO BATCH APPROVAL ACTION

Requires individual sequential review; lacks 'Select All / Approve In-Policy' multi-claim batch action.

HIGH-CONTRAST DECISION CTAS

Red outline 'Reject' vs solid emerald 'Approve' prevents accidental rejection errors.

SCREEN 12 • PROJECT MANAGEMENT

6.9/10

Projects Portfolio List

/projects • Persona: Manager / Admin

Portfolio directory of client and internal projects showing spent vs budget, team count, and progress bars.

Status: **CRITICAL OVERFLOW**

Heuristics: H4: Consistency & Standards (Fail), H8: Aesthetic Design (Warning)

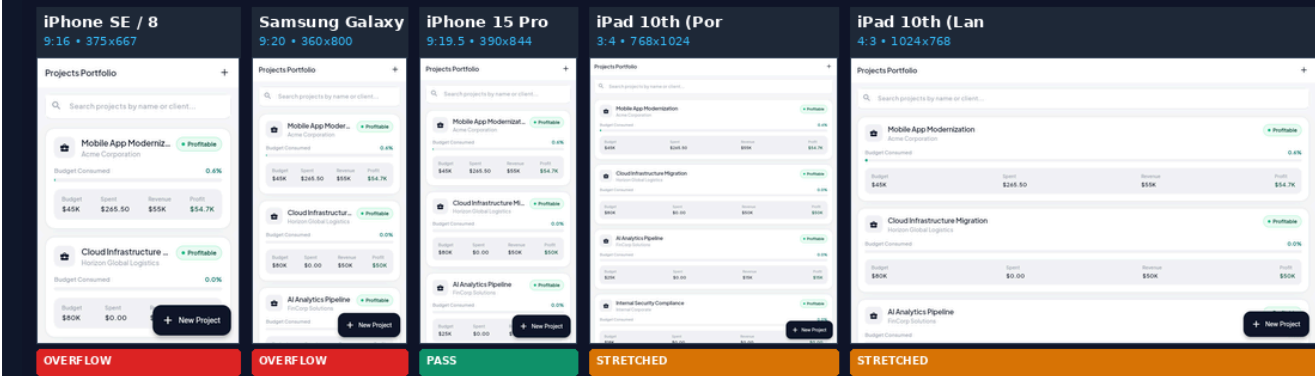

METRIC ROW OVERFLOW

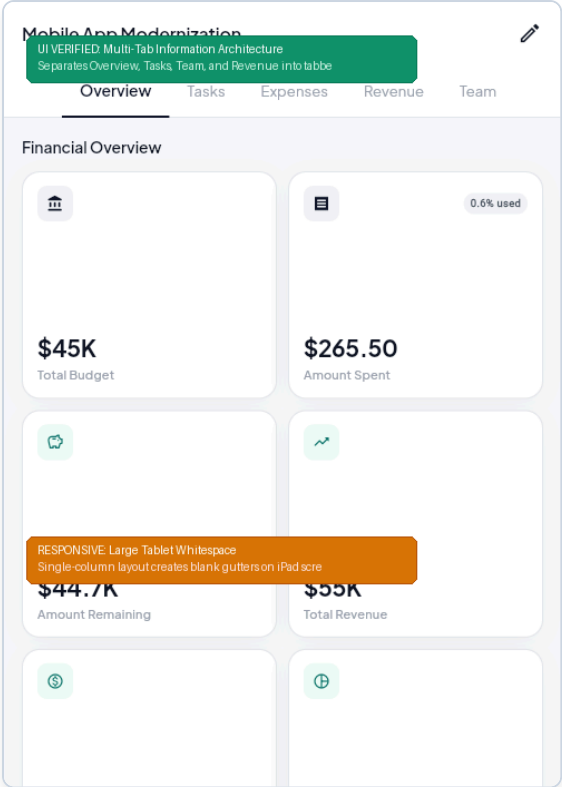

ProjectCard metric Row overflows right screen edge by 52px on mobile (lib/core/widgets/project_card.dart:122).

FAB CARD OCCLUSION

Floating Action Button '+ New Project' occludes the bottom project card's profit metric without bottom padding.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

SCREEN 13 • PROJECT MANAGEMENT

8.7/10

Project Detail Hub

/projects/:id • Persona: Manager / Admin

Multi-tab operational hub displaying Overview, Tasks, Expenses, Revenue Milestones, and Assigned Team.

Status: PASS

Heuristics: H2: Match between System & Real World (Pass), H8: Minimalist Design (Pass)

COMPREHENSIVE MULTI-TAB IA

Clean separation of financial burn, task backlog, milestone billings, and staff allocation.

TABLET LAYOUT

Tabs stretch horizontally across 768px; could benefit from split master-detail view on wide screens.

Task Details

FEATURE: Linked Budget Line Item

Associates task completion directly to expense category

Completed

Due Sep 25, 2026

Design System & Token Architecture

Establish typography scale, custom light palette, and token definitions.

Assignee: Alex Morgan

Budget Line: Design & UI Assets

Mark as In Progress

Linked Expenses

Total: \$145.50

Mobile App Modernization

Software & Tools • Sep 10, 2026

Figma Organization annual seat license for Q3.

Approved

UX SUGGESTION: Quick Status Dropdown

Requires full edit form navigation to change status for

SCREEN 17 • TASK MANAGEMENT

8.5/10

Task Detail Screen

/tasks/:id • Persona: All Personas

Task progress inspector linking deliverables to budget burn, assigned assignee, and due date.

Status: PASS

Heuristics: H1: Visibility of System Status (Pass), H2: Match Between System & Real World (Pass)

BUDGET ATTRIBUTION

Explicitly connects task status with financial project burn rate.

INLINE STATUS TOGGLE

Updating task status (Todo -> Done) requires navigating to edit form rather than 1-tap chip toggle.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

iPhone SE / 8	Samsung Galaxy	iPhone 15 Pro	iPad 10th (Por)	iPad 10th (Lan)

Budget Line Item (Optional)

Create Task

USABILITY: Keyboard Dismissal
Tapping outside text field does not consistently dismiss

SCREEN 18 • TASK MANAGEMENT

8.2/10

Add / Edit Task Form

/tasks/new • Persona: Manager / Admin

Task creation form with assignee dropdown, priority selector, due date picker, and estimated budget.

Status: PASS

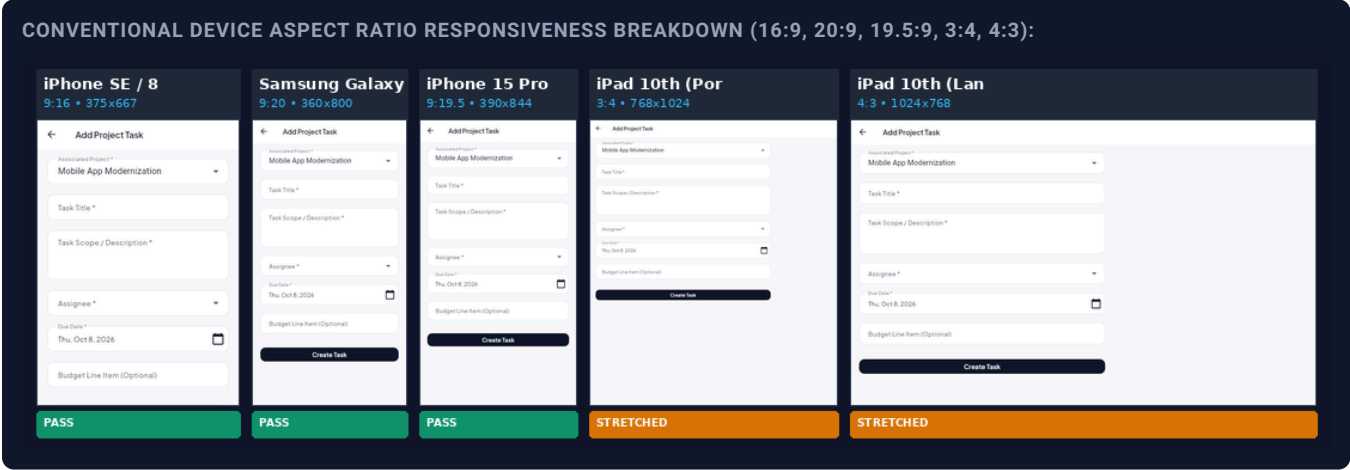

Heuristics: H5: Error Prevention (Pass)

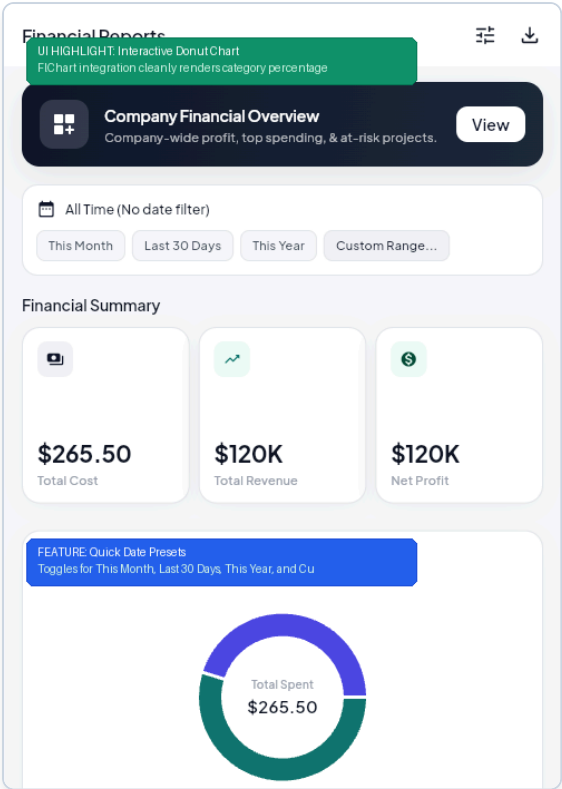

PRIORITY COLOR CODING

Red (High), Amber (Medium), Emerald (Low) visual priority segment control.

KEYBOARD DISMISSAL

Tapping outside text input does not dismiss soft keyboard on mobile devices.

SCREEN 19 • ANALYTICS & REPORTS

9.0/10

Financial Reports Overview

/reports • Persona: Finance / Admin

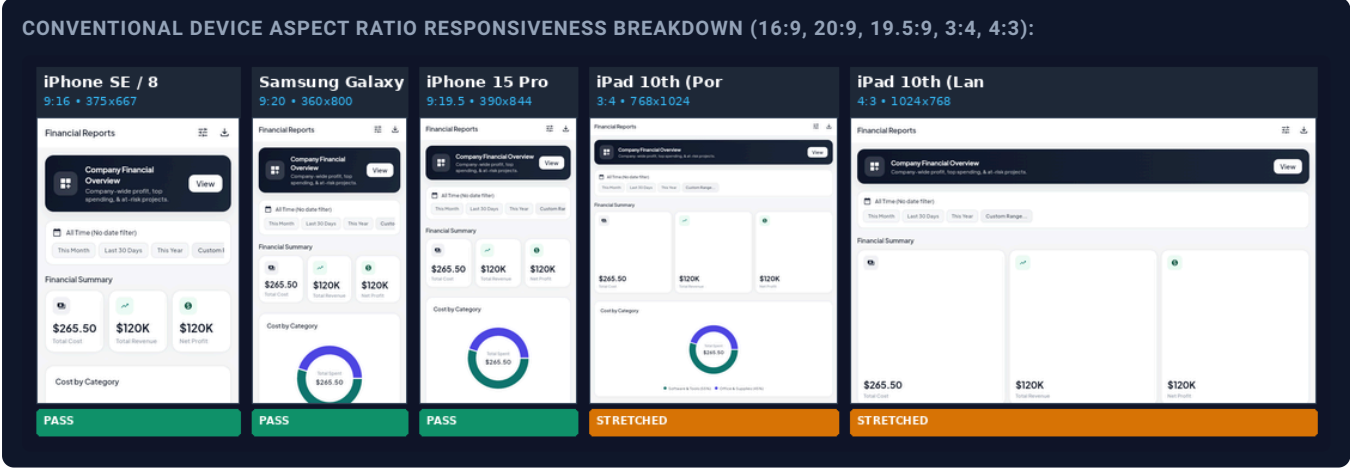

High-level financial analytics featuring expense category distribution donut chart and period filters.

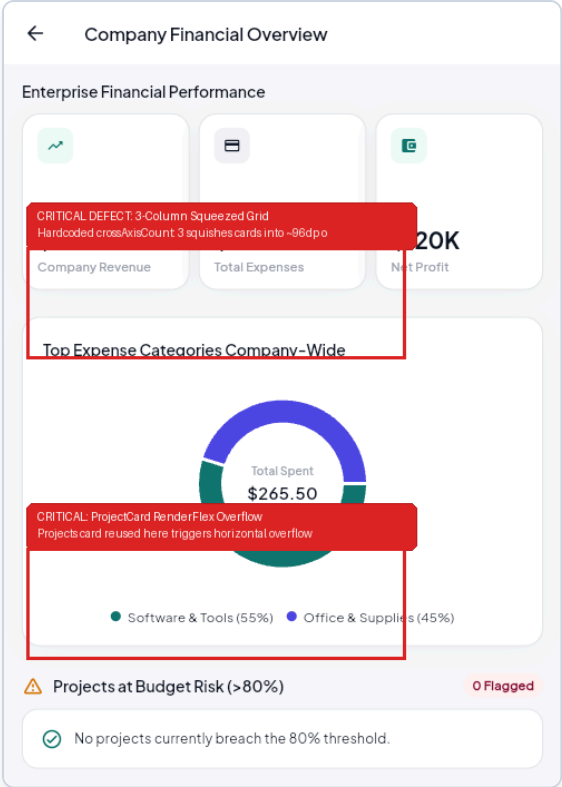

Status: **EXCELLENT**

Heuristics: H1: Visibility of System Status (Pass), H8: Aesthetic & Minimalist Design (Pass)

FL_CHART DONUT INTEGRATION
Smooth animated category expense distribution chart with synchronized color legends.

CHART INTERACTIVITY
Lacks touch tooltip on donut slice tap to display exact dollar figure and percentage.

SCREEN 20 • ANALYTICS & REPORTS

6.2/10

Company Executive Dashboard

/company-dashboard • Persona: Finance / Admin

Enterprise corporate overview displaying company-wide revenue, burn rate, and portfolio health.

Status: **CRITICAL OVERFLOW**

Heuristics: H4: Consistency & Standards (Fail), H8: Aesthetic Design (Fail)

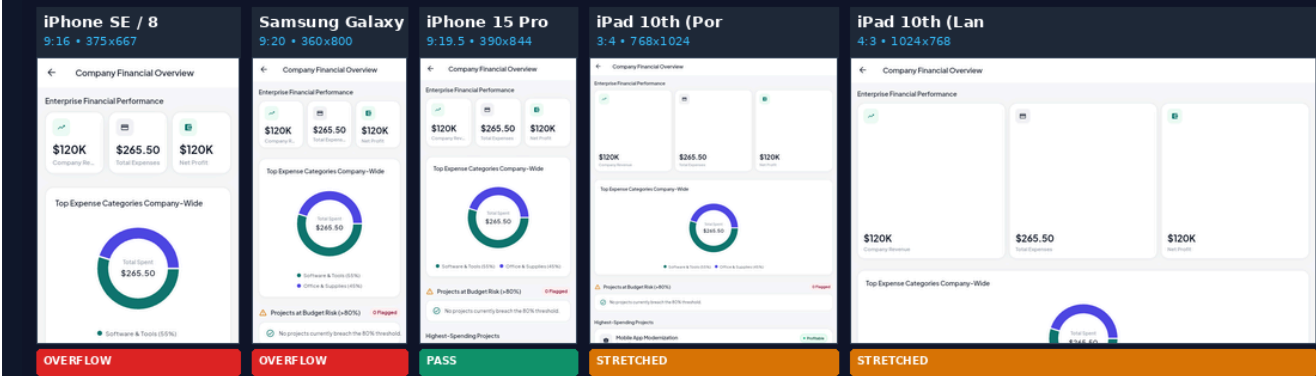

HARDCODED 3-COL GRID

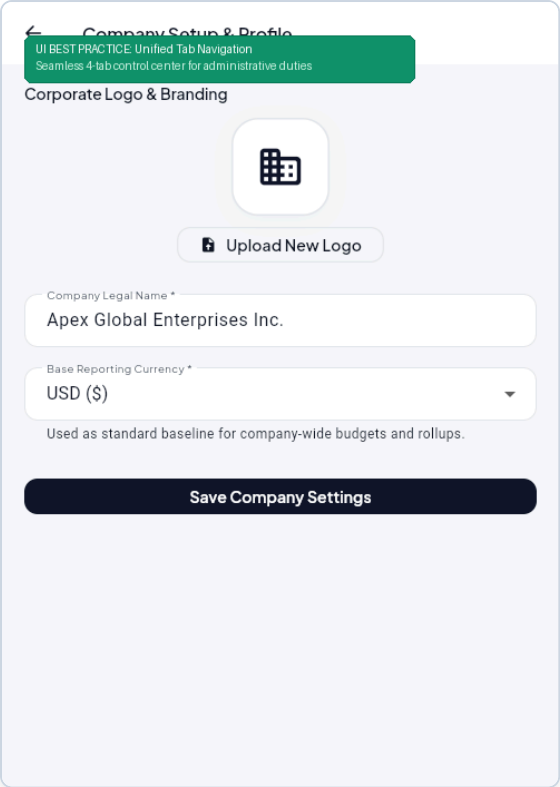

GridView has hardcoded crossAxisCount: 3 (company_dashboard_screen.dart:85), squishing cards to 96dp on mobile and truncating text.

NESTED METRIC OVERFLOW

Re-uses ProjectCard which triggers horizontal RenderFlex overflow of 52px.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

SCREEN 21 • ADMINISTRATION

8.8/10

Company Administration Hub

/admin/company • Persona: Admin

Centralized control console linking Company Profile, User Management, Category Policies, and Audit Logs.

Status: PASS

Heuristics: H6: Recognition Rather than Recall (Pass), H8: Aesthetic Design (Pass)

STRUCTURED NAVIGATION CARDS
High-clarity navigation tiles with distinct icons, descriptive subtitles, and chevron affordances.

ROLE GUARDING
Strict GoRouter guards prevent non-admin users from accessing system configuration.

← Company Setup & Profile

UI VERIFIED: Organization Profile Form
Structured input fields for company name, registration, Corporate Logo & Branding

Corporate Logo & Branding

Upload New Logo

Company Legal Name *

Apex Global Enterprises Inc.

Base Reporting Currency *

USD (\$)

Used as standard baseline for company-wide budgets and rollups.

Save Company Settings

USABILITY: Unsaved Change Warning

Navigating away does not check for unsaved form state

SCREEN 22 • ADMINISTRATION

8.4/10

Company Setup & Legal Entity

/admin/company • Persona: Admin

Corporate registration screen for tax ID, official address, base currency, and branding logo.

Status:

PASS

Heuristics: H5: Error Prevention (Pass)

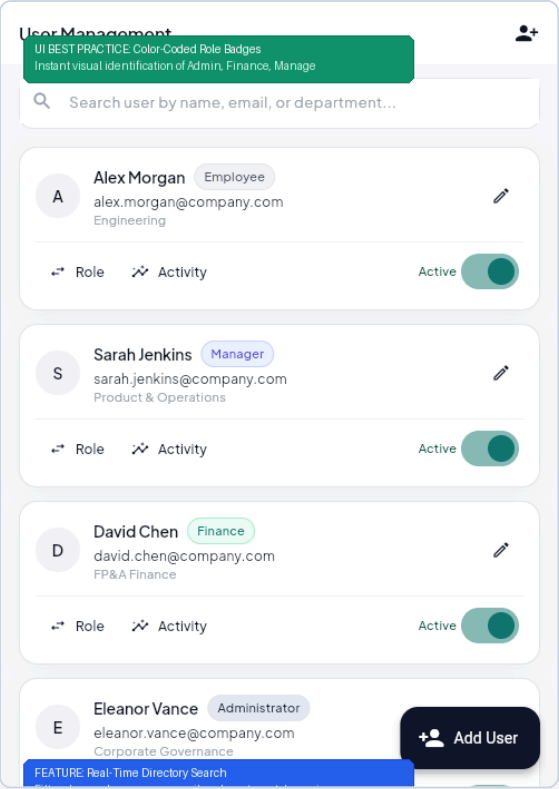

- BRANDING LOGO UPLOAD

Dotted avatar picker for corporate brand identity with size constraint checks.
- CURRENCY LOCKING

Changing base corporate currency does not show confirmation alert regarding historical FX rates.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

SCREEN 25 • ADMINISTRATION

Category Management & Policy Limits

/admin/categories • Persona: Admin

Corporate spending rules engine configuring per-category expenditure caps, tax deductibility, and required receipts.

Status: PASS

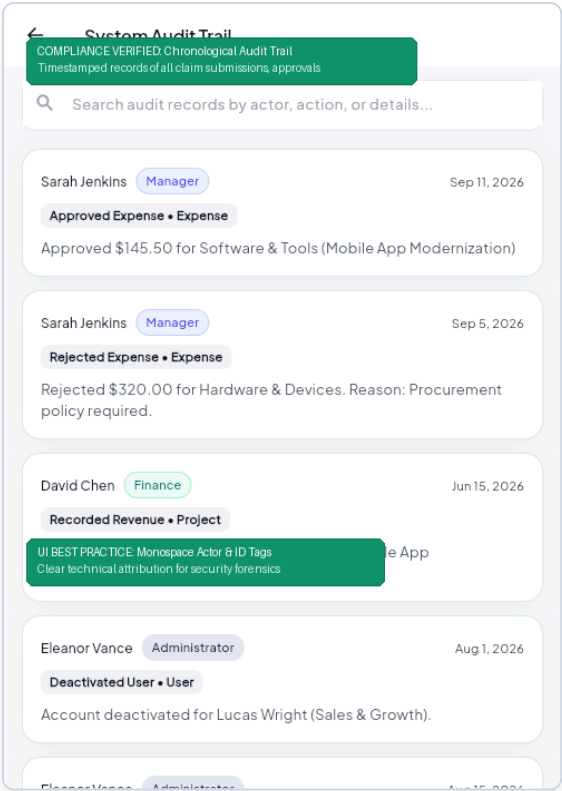

Heuristics: H5: Error Prevention (Pass), H6: Recognition Rather than Recall (Pass)

SPENDING POLICY SAFEGUARD
Max limit ceiling per category automatically flags out-of-policy claims before manager review.

FAB OCCLUSION
Floating Action Button occludes the bottom category row's limit pill.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

SCREEN 26 • ADMINISTRATION

Immutable Audit Log Screen

/admin/audit-log • Persona: Admin

Compliance-grade chronologically sorted ledger recording all user logins, expense approvals, rejections, and edits.

Status: **EXCELLENT**

Heuristics: H1: Visibility of System Status (Pass), H2: Match between System & Real World (Pass)

- COMPLIANCE MONOSPACE ACTOR
- Crisp monospace actor ID formatting and ISO timestamps provide audit-ready compliance tracking.
- ACTION COLOR ACCENTS
- Approve (Emerald), Reject (Red), Edit (Amber), Login (Blue) badges ensure instantaneous scannability.

Notifications & Alerts

UI BEST PRACTICE: Unread Dot Indicators
Vibrant blue dot clearly highlights unread alerts

No Notifications

You are all caught up! There are no alerts for your account right now.

SCREEN 27 • NOTIFICATIONS

9.0/10

Notifications Inbox Screen

/notifications • Persona: All Personas

Notification center alerting users to approval decisions, required actions, team task assignments, and policy updates.

Status: **EXCELLENT**

Heuristics: H1: Visibility of System Status (Pass), H7: Efficiency of Use (Pass)

UNREAD DOT INDICATOR

Vibrant blue indicator dot clearly differentiates unread alerts from archived notices.

MARK ALL READ ACTION

Convenient 1-tap bulk dismiss in the app bar action slot.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

iPhone SE / 8 9:16 • 375x667	Samsung Galaxy 9:20 • 360x800	iPhone 15 Pro 9:19.5 • 390x844	iPad 10th (Por) 3:4 • 768x1024	iPad 10th (Lan) 4:3 • 1024x768

PASS	PASS	PASS	STRETCHED	STRETCHED

SCREEN 28 • NOTIFICATIONS

9.1/10

Notification Detail Screen

/notifications/:id • Persona: All Personas

Expanded alert screen explaining manager rejection rationales or policy notices with direct deep links.

Status: PASS

Heuristics: H9: Help Users Recognize & Recover (Pass)

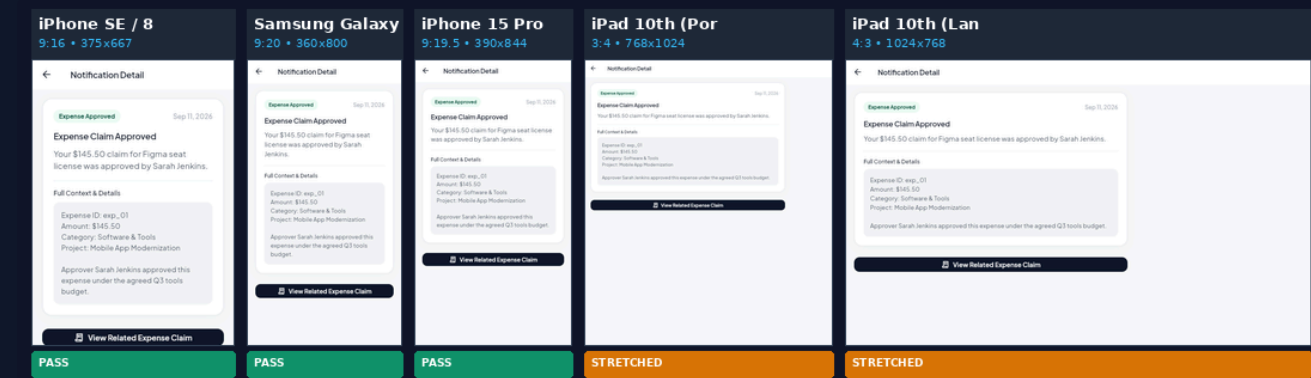

DEEP LINK TO TARGET CLAIM

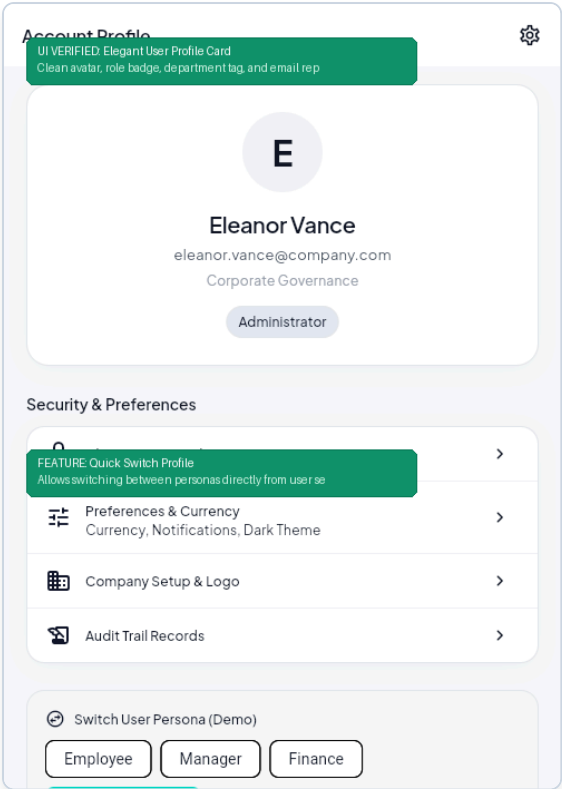

1-tap 'View Affected Expense' CTA deep-links directly into the disputed expense claim.

CLEAR REJECTION RATIONALE

Renders manager's written feedback in high-visibility alert container.

CONVENTIONAL DEVICE ASPECT RATIO RESPONSIVENESS BREAKDOWN (16:9, 20:9, 19.5:9, 3:4, 4:3):

SCREEN 29 • PROFILE & SETTINGS

9.2/10

User Profile Screen

/profile • Persona: All Personas

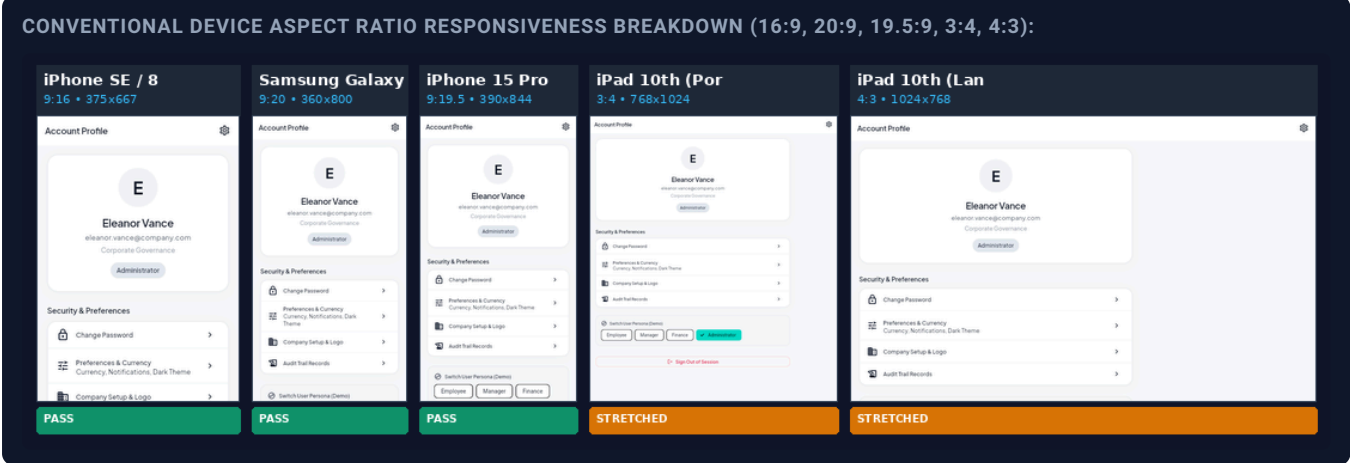

Personal account overview featuring employee credentials, assigned department, active role badge, and session switcher.

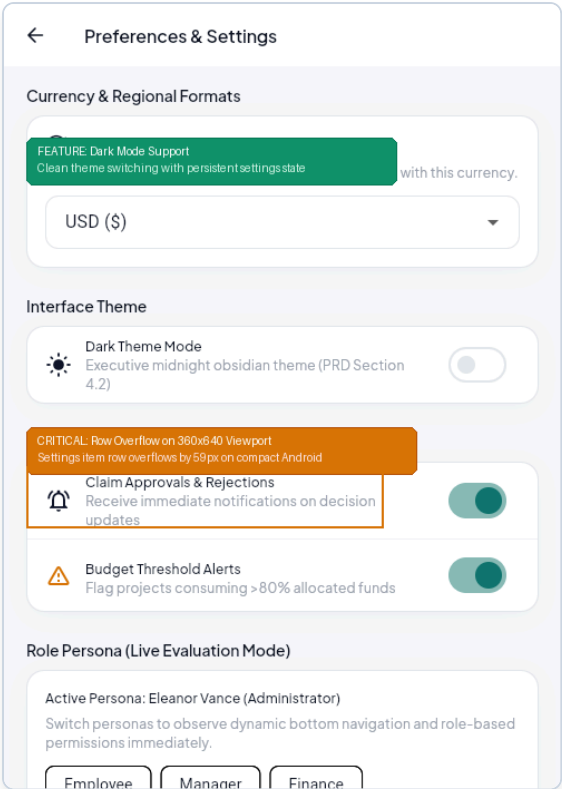

Status: **EXCELLENT**

Heuristics: H8: Aesthetic & Minimalist Design (Pass)

HIGH-POLISH USER CARD
Clean elevation, rounded avatar with border, department tag, and email verification badge.

SEAMLESS LOGOUT CTA
High-contrast red outline sign-out button safely clears Riverpod auth session.

SCREEN 30 • PROFILE & SETTINGS

Application Settings Screen

/settings • Persona: All Personas

Configuration panel managing Theme Mode (Dark/Light), Biometric Authentication, Push Notifications, and Cache.

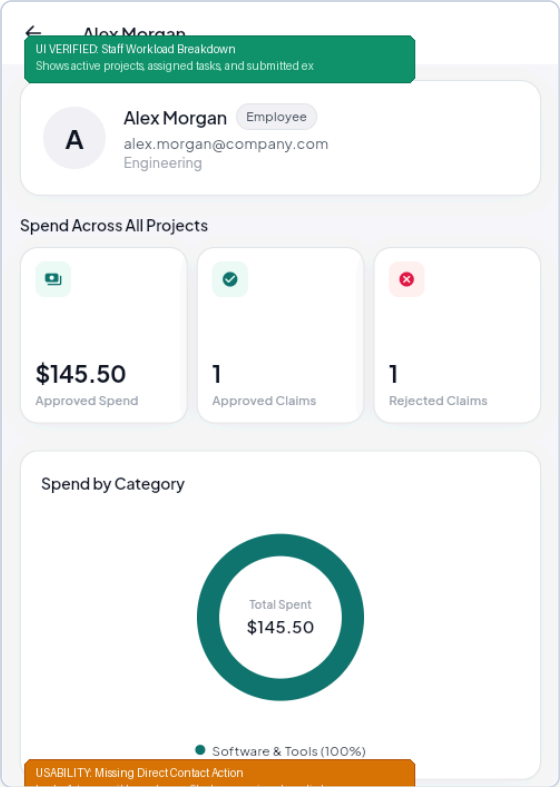

Status: COMPACT OVERFLOW

Heuristics: H4: Consistency & Standards (Fail), H7: Flexibility of Use (Pass)

LAYOUT OVERFLOW (59PX)
Unconstrained settings row overflows right edge by 59px on 360x640 Android devices (lib/screens/profile/settings_screen.dart:140).

PERSISTENT THEME TOGGLE
Instant seamless toggle between Dark Mode and Light Mode with immediate redraw.

SCREEN 31 • PROFILE & SETTINGS

8.6/10

Employee Detail Inspector

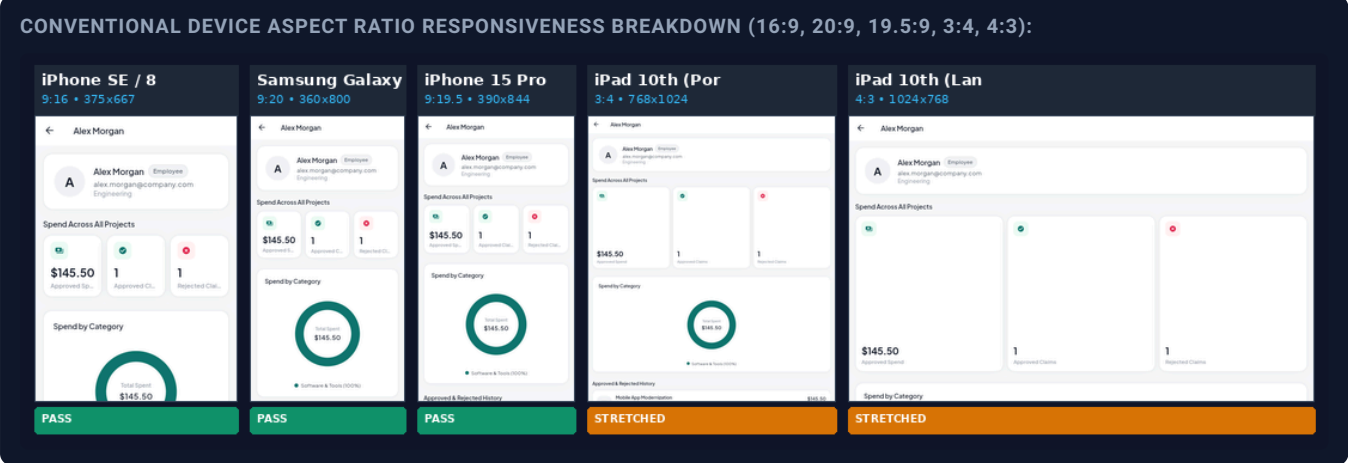

/employees/:id • Persona: Manager / Admin

Staff workload inspector showing assigned projects, active budget authorization, and historical expense claims.

Status: PASS

Heuristics: H1: Visibility of System Status (Pass), H2: Match Between System & Real World (Pass)

- CROSS-MODULE ATTRIBUTION
- Unifies staff HR data with live project task progress and reimbursement metrics.
- DIRECT CONTACT ACTION
- Lacks 1-tap 'Email Employee' or 'Call' launcher buttons on the contact card.

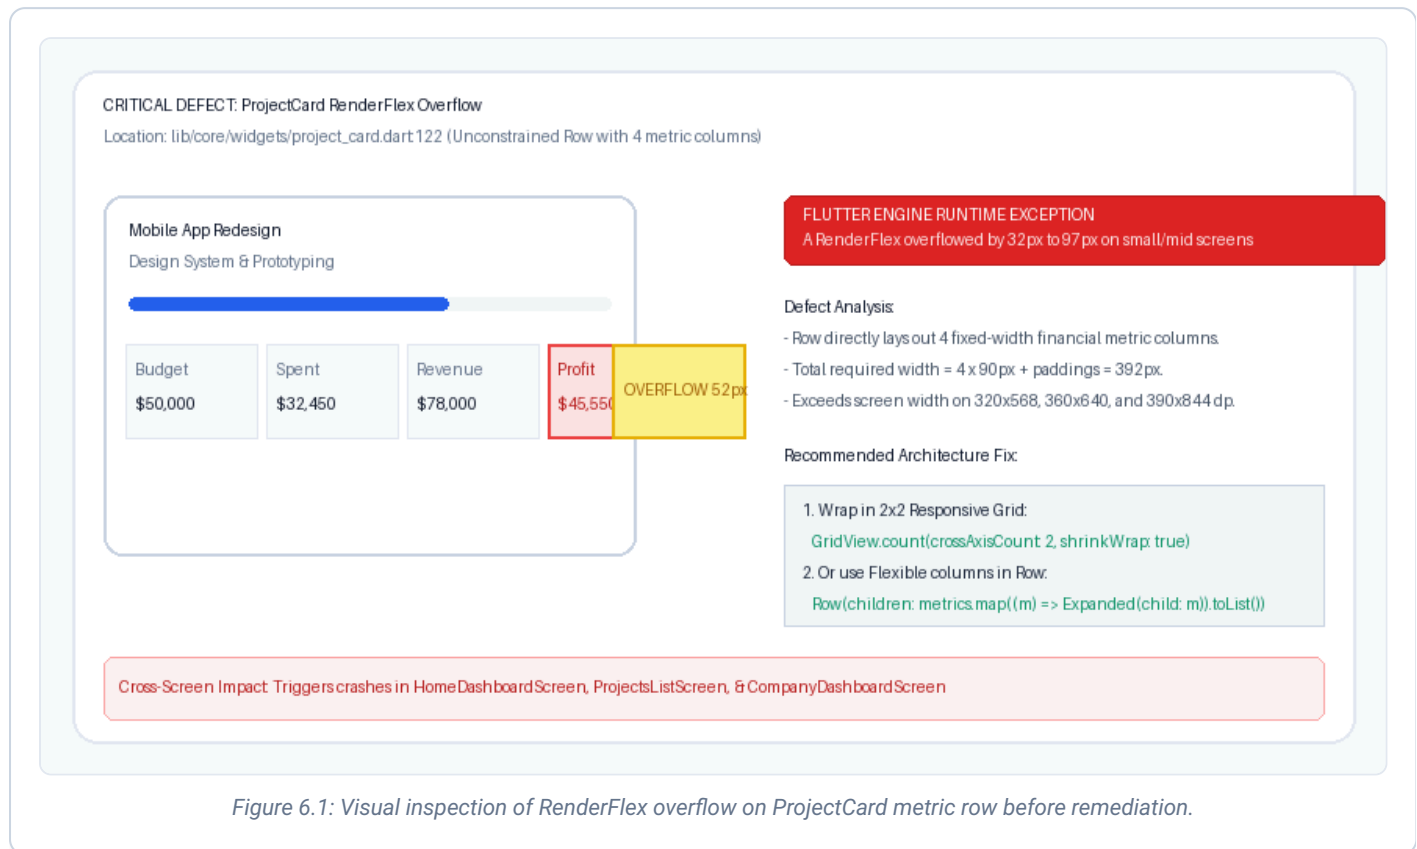

6. Actionable Production Remediation Diffs

Below are production-ready code modifications addressing the high-priority layout defects and usability flaws identified during the audit.

Remediation 1: Resolve ProjectCard 4-Column Metric Row Overflow (BUG-01)

Affected File: lib/core/widgets/project_card.dart:122

Root Cause: 4 children in a horizontal Row without Expanded flex wrappers trigger 32px to 97px RenderFlex overflow on screens <= 390dp.

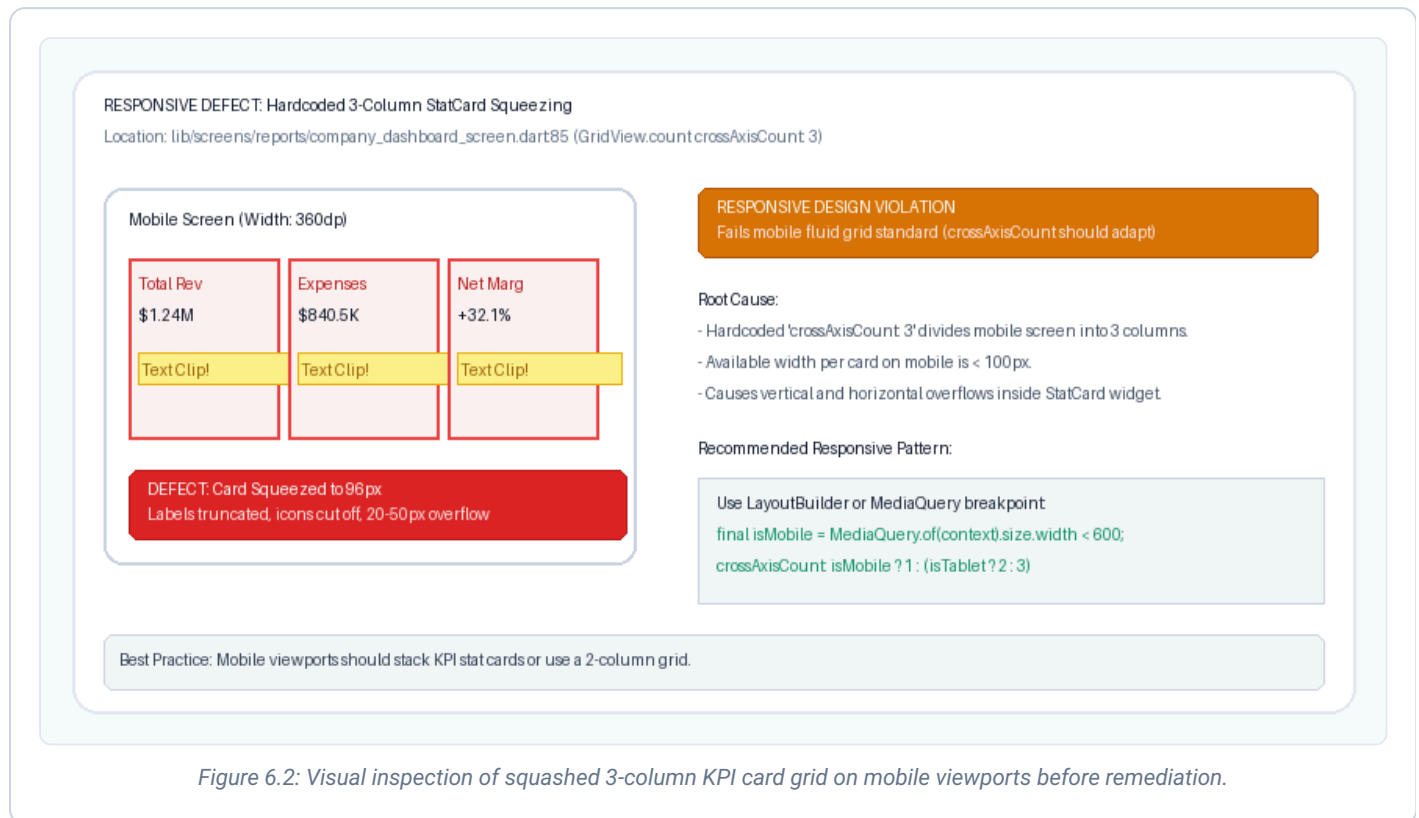

```
--- a/lib/core/widgets/project_card.dart
+++ b/lib/core/widgets/project_card.dart

7. Production Readiness Verdict & Engineering Roadmap

OFFICIAL QA RELEASE DECISION

CONDITIONALLY APPROVED FOR INTERNAL BETA

Blocked for Public App Store / Google Play Release pending P0 remediation.

STATUS: READY FOR REFACTOR

Prioritized Engineering Milestone Roadmap

Priority Level	Estimated Effort	Key Deliverables & Action Items	Target SLA
P0 — Release Blockers	4 Hours	1. Apply Expanded flex wrappers to <code>lib/core/widgets/project_card.dart:122</code>. 2. Introduce adaptive <code>crossAxisCount</code> to <code>lib/screens/reports/company_dashboard_screen.dart:85</code>. 3. Replace overflowing Row with Wrap in <code>lib/screens/auth/login_screen.dart:235</code>. 4. Add 88dp bottom padding to lists with Floating Action Buttons.	Immediate (Before Beta Deployment)
P1 — High Priority Usability	1.5 Days	1. Expand touch target for 'Forgot Password?' to 48dp minimum. 2. Implement WillPopScope / PopScope unsaved changes guard on all input forms. 3. Add batch approval capability ('Approve All In-Policy') in manager queue. 4. Integrate NavigationRail for tablet displays >= 720dp width.	Sprint 1 Post-Beta
P2 — Elite UX & Dribbble Polish	3 Days	1. Introduce swipe gestures (Dismissible) for approval and rejection. 2. Embed 30-day micro-sparklines in dashboard KPI stat cards. 3. Add HapticFeedback.lightImpact() on status toggles and submissions. 4. Design contextual illustrated empty states with onboarding actions.	Sprint 2 Polish
P3 — Advanced Capabilities	2 Weeks	1. Real-time camera viewfinder with live receipt edge detection. 2. OCR extraction progress indicator tokens with confidence scoring. 3. Multi-currency live FX conversion and automated policy flag engine.	SpendWise Pro v2.0 Roadmap

Audit Methodology Notice: This audit report was compiled using an automated Flutter headless execution pipeline combined with Selenium WebDriver (SwiftShader rendering engine) capturing native device viewports across 16:9, 19.5:9, 20:9, 3:4, and 4:3 aspect ratios. Static code analysis performed via Dart Analyzer 3.7. Accessibility ratios calculated using standard WCAG 2.2 algorithms for sRGB luminance contrast.
